

Instruction Manual

CRITICAL: Please read these instructions before use!

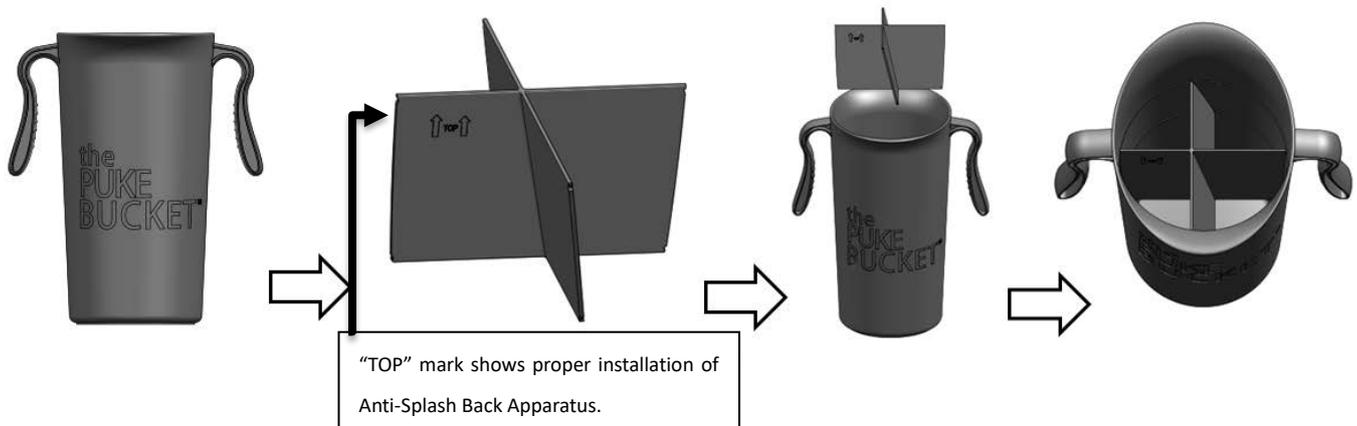

Thank you for purchasing **the Puke Bucket™!** Puke. Rinse. Repeat. Now with the Anti-Splash Back Apparatus.

The Puke Bucket is a reusable container for vomiting, specifically designed to curve more comfortably around your face than a toilet seat. Each Puke Bucket includes a removable "Anti-Splash Back Apparatus" designed to reduce messy situations for those particularly violent vomiting episodes. Exterior handles are designed to provide a sense of emotional security while vomiting and can also be used to hang the Bucket on headboards, bed railings, door handles, etc.

The yellow color makes the Puke Bucket distinct among other household items, thereby reducing the chances you will make iced tea for your neighbors in the same bucket that held last night's seafood surprise.

Please Note: The Puke Bucket is made of PP BPA FREE material, so you should not expect to get cancer as a direct result of using the Puke Bucket.

How to insert the **ANTI-SPLASH BACK APPARATUS** correctly:

WARNING!

The Puke Bucket may be dangerous for children and pets. If you choose to ignore this legal liability disclaimer and proceed with offering the Puke Bucket to a child or a pet, appropriate and responsible supervision is recommended. If you are waiting to vomit while reading this and need something to pass the time – or if you are a lawyer – please visit our website to read additional legal information.

The Puke Bucket is dishwasher safe, but only at temperatures less than 149 degrees Fahrenheit.
